Professional Summary

- Full Stack Developer with 4+ years of comprehensive coding experience through professional work, freelancing, and intensive software engineering training. Specialized in JavaScript/TypeScript and Python ecosystems, with proven expertise in React.js, Node.js, and modern web frameworks. Demonstrated success in developing scalable web applications, implementing automation workflows, and optimizing business processes. Strong background in remote collaboration and working with international teams across time zones. Bilingual in English and French, with a track record of delivering client-focused solutions and maintaining clear technical documentation.

Work Experience

Software Engineer - Tech Lead   **Dec 2023 – Sep 2024**
Lendstack Inc.   *Remote*

- Led development of web-based solutions using React.js and Node.js, improving operational efficiency by 40%
- Implemented automated workflows and integrations using Zapier and custom APIs for business process optimization
- Designed and optimized PostgreSQL databases for enhanced data management and security
- Maintained detailed technical documentation and conducted knowledge-sharing sessions for team members

Freelance Full Stack Developer   **Sep 2024 – Present**
Fiverr   *Remote*

- Developing custom web applications using React.js and Node.js for international clients
- Implementing automated solutions and integrations to optimize business workflows
- Collaborating with clients across different time zones while maintaining clear communication

Technical Skills

Frontend: React.js, Angular, Vue.js, TypeScript, Tailwind CSS, Material-UI
Backend: Node.js, Python, Django, RESTful APIs, Microservices Architecture
Automation & Integration: Zapier, API Development, Workflow Optimization
Databases: PostgreSQL, MySQL, MongoDB, Redis
Development Tools: Git, Docker, CI/CD, Agile Methodologies, Remote Collaboration

Featured Projects

Streamix - Video Streaming Platform   **2025**
Full Stack Development   *Next.js, TypeScript, Material-UI*

- Built a Netflix-inspired streaming platform with dynamic content loading and trailer playback
- Implemented client-side search with instant results and category filtering using TMDB API

Spotify Profile Viewer (GitHub)   **2025**
Full Stack Web Application   *Next.js, TypeScript, Tailwind CSS, Shadcn*

- Developed a full-stack application integrating Spotify Web API for OAuth authentication and data retrieval
- Built responsive UI with Tailwind CSS and complex state management for user sessions

Personal Portfolio Website   **2025**
Full Stack Development   *Next.js, TypeScript, Tailwind CSS*

- Engineered a modern portfolio with real-time GitHub integration via GraphQL and Framer Motion animations
- Optimized performance and accessibility while maintaining clean, maintainable code

SpinShot - Multiplayer Gaming Platform   **2023**
Full Stack Development   *TypeScript, Node.js, WebSocket*

- Built a real-time multiplayer gaming platform using WebSocket with user authentication
- Utilized PostgreSQL for data persistence and Redis for performance optimization

Education

1337 School - 42 Network   **2021 – Present**
Advanced Software Engineering Program   *Khouribga, Morocco*

- Completed intensive Common Core curriculum (20+ projects) in system programming and web development
- Currently pursuing Senior Software Architect specialization with focus on system design

Languages & Certifications

Languages:

- English (Fluent)
- French (Professional)
- Arabic (Native)

Certifications:

- CodinGame - Python (Advanced)
- CodinGame - JavaScript (Advanced)
- CodinGame - C/C++ (Advanced)
